

MATH182 HOMEWORK #6
DUE July 31, 2020

Exercise 1. *Write a brief reflective essay discussing your personal journey and growth in the subject of algorithms these past six weeks. Some questions to consider:*

- *What new points of view do you have?*
- *What new ways do you think about things?*
- *Are there any topics we covered which resonated with you?*
- *In the future, which things from this class do you imagine using?*

Note: this is not the same thing as a course evaluation. In the (anonymous) course evaluation you should be critical of the instructor and TA. Instead, this assignment is meant to be an exercise in introspection and self-evaluation. As for length, just a paragraph is fine, although you are welcome to write as much as you want or are inspired to write. Grading will only be based on whether you do the assignment or not.
